HALE BROS. & CO.

HALE BROS. & CO.'S

ANNUAL

Summer Clearance Sale

—WILL COMMENCE ON—

Monday, Aug. 4th.

We Propose to Make This Sale Without a Parallel Upon This Coast!

All that can be done by our firm to make this the most successful of all our sales will be pushed to the front.

We intend to spare no department of our House, and nothing in our entire establishment shall escape the ban of reduction. Such a weeding out of stock has never before occurred in the city of Sacramento, and when we say that we shall place this sale on the Calendar of Time without a single parallel, we know whereof we speak, and believe that we are fully equal to the task. We have only

FOUR WEEKS

To accomplish the much-desired end of closing out every item of SPRING AND SUMMER GOODS in our house. We want the people of this City, Valley and Coast to help us. We shall make it an object for you to do so, and guarantee that every dollar left in our house will prove a profitable investment. The prices placed upon each and every item shall be so low as to drive all doubt from the minds of the most skeptical.

We mean business, and all who visit us will reap a harvest never to be forgotten. Our entire staff are now at work preparing for this sale, and so arranging the stock as to overcome all delays possible. We shall increase our force of Salesmen, and in every way possible make our patrons at ease in making purchases.

We shall issue a small PRICE LIST as a particial index to the many exceptional values that will be thrown upon our counters.

Our doors will open on Monday morning next at 8 o'clock. Nothing shall be spared.

Orders from the Country Receive Prompt and Careful Attention.

LEONARD'S ECONOMICAL SUBTRACTION METHODS.

THE ABOVE TITLED WORK, JUST PUBlished, gives economical rules for obtaining results in FRACTIONS without reducing them to a common denominator. Also, gives many economical rules for operations in SIMPLE NUMBERS. These rules are original. They are not to be found in the works of any other mathematical author. They are general in their application. Teachers, pupils and all whose business necessitates mathematical calculations are especially invited to examine the work. For sale at all bookstores in Sacramento; E. H. Guppy, San Jose; S. Davis, College City; J. B. Elston, Woodland; J. T. White & Co., San Francisco; and W. B. Hardy, Oakland. Agents wanted. Advertising Cheats!!!

"It has become so common to begin an article in an elegant, interesting style.

"Then run it into some advertisement, that we avoid all such,

"And simply call attention to the merits of Hop Bitters in as plain, honest terms as possible,

"To induce people

"To give them one trial, which so proves their value that they will never use anything else."

"THE REMEDY so favorably noticed in all the papers,

Religious and secular, is

"Having a large sale, and is supplanting all other medicines.

"There is no denying the virtues of the Hop plant, and the proprietors of Hop Bitters have shown great shrewdness and ability * * *

"In compounding a medicine whose virtues are so palpable to every one's observation."

Did She Die

"No!

"She lingered and suffered along, pining away all the time for years,"

"The doctors doing her no good;"

"And at last was cured by this Hop Bitters the papers say so much about."

"Indeed! Indeed!"

"How thankful we should be for that medicine."

A Daughter's Misery.

"Eleven years our daughter suffered on a bed of misery,

"From a complication of kidney, liver, rheumatic trouble and nervous debility,

"Under the care of the best physicians,

"Who gave her disease various names,

"But no relief,

"And now she is restored to us in good health by as simple a remedy as Hop Bitters, that we had shunned for years before using it."—THE PARENTS.

Father is Getting Well.

"My daughters say:

"How much better father is since he used Hop Bitters."

"He is getting well, after his long suffering from a disease declared incurable."

"And we are so glad that he used your Bitters."—A LADY of Utica, N. Y.

CALIFORNIA.

Murdered Man Identified.

NAPA, July 31st.—At the request of parties from Vallejo, the Coroner of Napa county yesterday exhumed the body of the man lately found near Vallejo. The body was positively identified as Lawrence Lynch, who was lately paid about $1,000 and discharged from the Pensacola. It is very evident that he was murdered for his money. At the examination it was discovered that the skull had been fractured.

Accidental Shooting.

FRESNO, July 31st.—This morning a negro was found lying near the Fresno cannery suffering from a gun-shot wound. He claims that he accidentally shot himself. The ball entered the right side below the ribs and ranged upward, passing out above the heart. The wound is mortal. He had just arrived here from Woodland.

Fatal Fall.

SAN LUIS OBISPO, July 31st.—This morning, while a young man, a Dane, employed in painting a house, in some manner slipped and fell a distance of twenty-five feet to the ground, crushing his head most horribly. He died on the instant.

OREGON.

Salmon Packing on the Columbia.

PORTLAND, July 31st.—To-day the salmon canneries along the lower Columbia river were all closed. Some astonishing figures have been given regarding the probable output of salmon for the present season, some figures nearly reaching 700,000 cases. The pack the past month has been very large, and had it extended over another month probably the above figures would have been reached. It is certain that there have been over 500,000 cases of salmon put up since the 1st of April, but in the absence of direct facts from the canners it would be unsafe to predict a much larger pack. A large amount of this will go direct to England, and nearly all the vessels now under charter in the river will carry salmon over to London or Liverpool. The pack in British Columbia and Alaska will be as large as last year, according to late estimates.

BRITISH COLUMBIA.

Advices from Victoria.

VICTORIA, July 31st.—At Barnes' Hotel, Thompson river, Monday, William Abishire struck a man named Carey on the head with a shovel, from the effects of which death resulted the following day. Abishire mounted a horse and fled, and the Governor has offered a reward for his arrest.

Last night several ladies and gentlemen passing along View street, observed a group of men blocking the sidewalk. Approaching they thought them drunk. A gentleman observed one of the gang holding another by the throat, who exclaimed, "By —, give me that knife." The men quickly left, and a halfbreed named Insley, employed on one of the boats, was found insensible on the sidewalk. Brandy was poured down his throat, and he revived consciousness. His money was gone, and he was sent to the hospital. His neck showed no marks of violence, but his eyes were starting from their sockets. The police are scouring the city for the garroters.

OLD MEXICO.

Guaymas Items.

GUAYMAS, July 31st.—The sloop Julieth, with the Captain and crew of the schooner San Pablo, arrived to-day. The San Pablo was foundered at sea, near Carmen Islands, on the 15th of July, on her voyage from here to Mazatlan. The cargo and vessel were a total loss, but were fully insured.

Our city physician has discovered a new fever, which he calls pernicious fever, and declares it to be contagious. A man and his wife attacked with the disease were to-day removed out of town. There is at present no yellow or malarious fever here.

At 12 o'clock to-day the street cars laden with stone, on the principal street, ran over Juan Pablo, severing the right hand above the wrist. It is feared the accident may be fatal.

Luis Rhuller, the prime mover in the scheme to colonize the Yaqui river, under concession from the Government, will arrive here to-night, when active measures will be inaugurated.

The thermometer to-day marks 100°—the highest range this year.

General Carbo and staff left for Mazatlan on the steamer Sonora; also J. Silver, lately appointed Consul at Lopez, Lower California.

Beecher on Blaine.

Anything proclaimed from the pulpit must, of course, be regarded as truth, and since our friend Henry Ward Beecher, in a sermon preached November 14, 1880, supported Blaine in the following vigorous manner, his present position in opposition to him leaves the Brooklyn divine in a very awkward corner. In the sermon referred to Mr. Beecher said: "That there has been a most deliberate conspiracy carried out in all its parts with foresight, with malign and infamous intent, to destroy the name of James G. Blaine, I have no more doubt than I have that I stand here, or that the devil goes to and fro, seeking whom he may devour, up and down among men. I have watched the progress of it. I have seen the venomous thrusts that have been made at him—a man I believe as pure as any other man that walks the earth; as conscientious, as sensitive to everything that is pure and virtuous; a Christian man, a Christian teacher, a good father and husband and neighbor; a good man, whose whole life has been the earning of a reputation and character that should rank him among the good men of the earth. I am not speaking of the miserable scribblers that have sought to join his name in the transaction of money matters. He has not a friend who, dying to-day, would not be proud to put his estate into the hands of James G. Blaine to take care of those whom he loved. Trust is unbounden in him; yet they tried to make him a miserable thief and liar, and to discrown him. They seem to think that a noble citizen, standing high in the estimation of the world, is lawful prey, and that they are to be credited with skill, with power and greatness, that know how to disrobe him and to tarnish his glory, which is the glory of the nation. I say these things with grief. I would not say them if the indignation of the Lord did not stir me to the very bottom and if I did not desire to have it known for generations to come that the men who undertook, by lies, by forgery and by persistence in them, to blight a fair fame, that on that man should rest the indignation of the Lord and of the nation, so that the people should be the voice of God come to judge such a man. It will come, it has come; and, as when the thunder breaks in the summer among the mountains, its crash is caught up by this mountain and thrown to that and to that, and goes echoing down upon the horizon, so down through the course of time the men that have conspired in this infamous thing will have the thunder of indignation still reverberating to the latest day."

CHASED BY A SPIDER.—The king of the spiders on the pampas is not a Mygale, but a Lycosa of extraordinary size, light gray in color, with a black ring around its middle. It is active and swift, and irritable to such a degree that one can scarcely help thinking that in this species nature has overshot her mark. When a person passes near one—say within three or four yards of its lurking-place—it starts up and gives chase, and will often follow for a distance of 30 or 40 yards. I came once very nearly being bitten by one of these savage creatures. Riding at an easy trot over the dry grass, I suddenly observed a spider pursuing me, leaping swiftly along and keeping up with my beast. I aimed a blow with my whip, and the point of the lash struck the ground close to it, when it instantly leaped upon and run up the lash, and was actually within three or four inches of my hand when I flung the whip from me. The gauchos have a very quaint ballad which tells that the city of Cordova was once invaded by an army of monstrous spiders, and that the townspeople went out, with beating drums and flags flying, to repel the invasion, and that after firing several volleys they were forced to turn and fly for their lives. I have no doubt that a sudden great increase of the man-chasing spiders, in a year exceptionally favorable to them, suggested this fable to some rhyming satirist of the town.—[The Gentleman's Magazine.

THE HOP MARKET.

The Prospects—What Eastern Dealers Say—Etc.

There appears to be a wide variance of opinion as between the producers and dealers in hops. The former are inclined to the belief that prices this year will range among the high figures, and base their ideas upon the reports furnished by Le May and other English hop factors, which show a bad state of the hop crop in England. The dispatch published in the RECORD-UNION from New York, under date of the 28th instant, shows that the crop in that State is also short. It says: "The eighth annual picnic of the hop-growers of Central New York, at Oneida Lake, is now being held, and 1,200 persons are present. Views were exchanged regarding the crops and business prospects generally. It was conceded that this year's crop is not up to the last, when the counties of Otsego, Madison, Oneida and Schoharie received $3,000,000 from foreign countries for their crop. It is thought this year's yield will be from one-third to one-half smaller." A dispatch received from San Francisco yesterday has the following: "A London cable to J. T. Cochran & Co. reports no improvement in the English hop crop. A great many hopyards have gone bad. The market is a shade firmer. A New York telegram to the same firm quotes the market as firmer and crop prospects more unfavorable."

A prominent hop-raiser of Sacramento county received a dispatch yesterday morning from London, which read: "Vermin increasing. At the utmost, but one-third of a crop will be secured." Acting on this information, and what he had previously learned, the gentleman referred to says that he will not sell a bale of hops this season for less than 35 cents per pound, and he will not contract for a large amount at that figure, believing that by November prices will be up to 50 cents.

On the other side of the question, the New York *Daily Commercial Bulletin* of July 23d says, in speaking of hops: "There is not the faintest indication of improvement in the market. Neither shippers nor brewers seem to require any considerable amount of stock at the moment, and holders are not varying on prices to an extent that would induce either class of buyers to anticipate future wants. Whether goods can be secured at lower prices than those quoted is uncertain, in the absence of business or any extensive offering. That holders would find it necessary to make round concessions to move a good-sized lot of any grade is, however, very probable. As matters stand, all prices quoted may be considered quite nominal; and from the standpoint of demand, the market is certainly weaker than otherwise. Yesterday a lot of 100 bales choice sold between dealers at 28c, and that price is top for cash business here. The Messrs. Dale Brothers announce the receipt in Boston of the first bale of new crop (1884) Eastern hops on the 22d inst. by their firm. The hops were grown by Mr. E. R. Heyward, of Easton, Mass., and were purchased by Mr. John Roessle, a prominent Boston brewer. This receipt is believed to be the earliest on record in this country for new hops."

The firm of Neubourg & Lages, of this city, who deal largely in hops, furnish the following private correspondence for publication:

NEW YORK, July 19, 1884.

DEAR SIRS: There is no life to our market, and prices are entirely nominal. Reports from the hop districts of this State speak well of the growing crop. The vine is clean and healthy. No lice or honey dew; all budded out and some in full bloom, although not so heavy as last year. Estimates of the yield are conflicting, though all agree that it will be lighter than last year. The cable reports of the English crop are the same as in our last. The London market is dull and inactive, with the prospect of a decline in price. Yours, etc. DOLE & MERRILL, 44 and 46 Pearl street.

CHICAGO, July 19, 1884.

DEAR SIRS: Your favor of the 8th duly received and contents noted, and we thank you for the information contained. We do not at present feel like contracting hops at 30 cents, as our correspondents in England and papers from Kent county indicate considerable improvement in their hop gardens, which has had the effect of reducing prices there and in New York from 8 to 10 cents. Estimates from your coast place your crop at about 70,000 instead of 50,000, as you have it, and we look for tolerably low figures in October and November. We are in communication with the brewers here and find there is a general feeling against making contracts at present. We hope to hear from you when there is a movement. Yours truly, E. JONES & CO., 622 Wells street.

CINCINNATI, July 21st.

DEAR SIRS: Yours of the 15th inst. at hand. We are surprised that you should speak of 30c for contracts. On the exact date of your letter, July 15th, we received a telegram from San Francisco offering us contracts of Sacramento at 25c. We did not, however, take any. We do not care to contract anything at present figures. Perhaps by the time this reaches you you may be able to offer us something lower; if not, may be later, just before picking. Keep us posted as to the California crop and market. Very respectfully, A. LEHMAN & CO., 170 Court street.

MUNNSVILLE (N. Y.), July 21, 1884.

DEAR SIRS: We would be pleased to have you advise us the lowest price you will sell us from three to five carloads of choice or prime Sacramento Valley hops, crop of 1884. October next shipment, draft three days sight against shipment. The growing crop in this State is looking well, and with continued favorable weather we may reasonably expect a surplus of over one hundred thousand bales for export if the crop on your side comes down as heavy as anticipated. Yours truly, BRIDGE, BARBER & CO.

R. J. Merkeley has a full force of men engaged in gathering his crop at the Comstock ranch, on the Yolo side of the river, ten miles above the city. He is also picking at his ranch below this city, but the crop there is not so far advanced. Mr. Lovdal, near Merkeley's home ranch, will commence picking in a few days, and in less than two weeks all producers on the Sacramento river lands will be gathering. Those on the American river lands will be a week or two later—perhaps more.

FRESCO DECORATING.—The art of fresco decorating, which was followed in the Italian style for many years, has advanced with architecture, and the frescoing now done is almost exclusively after the Renaissance pattern. Frescoing and plain painting go together. It is not that the frescoer is any less an artist. But in modern buildings, where both frescoing and plain painting are required, the division of work is not desirable, while there is almost as much difference in the quality of plain work as in that of fresco. Fresco painting, in the strict sense of the term, has made little progress in America, but fresco decorating has. The history of fresco painting during the first two centuries after the revival of art is a history of oil painting, as every work of importance was executed by that process. Michael Angelo is said to have expressed an opinion that fresco was fit for men, and oil painting only for women and the luxurious and idle. But for two centuries no works of more than average merit have been executed in Italy, while in England fresco painting seems unsuited to the genius of the English school. In America the only works of consequence are in the Capitol at Washington. On the other hand, fresco decorating has made rapid strides and has become an art by itself. In many business blocks and hotels in this city the frescoer has worked such transformation scenes that a traveler returning failed to recognize the landmarks. In private houses no decoration is so lasting and none other gives such a pleasing effect as frescoing well done. It has, too, this advantage, that small apartments may be made to appear more roomy, while such tints may be applied to spacious rooms as to make them lose too vast proportions. The eye is sometimes easily deceived, and the good frescoer knows it.—[New York Times.

Early in the present month Mr. Gladstone's career as Prime Minister of England had covered nine years and 147 days, which was one day more than Lord Palmerston's career covered. Two statesmen only during the last hundred years have governed the English people for a longer period than this. One of these was William Pitt, who held the office for eighteen years and ten months; the other was Lord Liverpool, whose period was fourteen years and ten months.

THE SANITARY AGITATION.

One of the speakers at the sanitary meeting of Wednesday struck the right chord when he said that what is needed here is continued agitation of the question of sanitary reform. That has been the view of the RECORD-UNION ever since it began this agitation a year and more ago. Its advice was to begin work then that everyone now demands shall be done and has been too long delayed. The speaker charged that there is apathy among our people on the subject not creditable to their intelligence. It must be admitted that they are not so quick to move in such matters as is desirable, but we have faith that now having entered upon the work, they will not cease the effort to accomplish great results. Whoever has read the proceedings of the meeting must be convinced of the urgent need for the application of immediate corrective and preventive measures. Suppose we fortunately escape cholera and yellow fever this year, it will not prove that the need for reform has diminished. The fear is that when the summer is over the people will become lethargic again upon this subject. The greatest efforts should be made to prevent this. How do we find ourselves now? With vast and imperative work to do and no possibility of accomplishing it all this season. One of the chief threats to the public health, we are told, cannot be removed under some months of hard labor, and at a great cost, and this is a confession of woful neglect in the past. It is perfectly evident that the cesspool system must be abolished. It was proven at the meeting that the soil is largely permeated by the taint of the cesspools, and well-borers find evidence of it constantly. This routs the theory that the annual sipage rise purifies the soil. As one of the Board of Health put it, "the earth is a great deodorizer, and the best oxydizing agent we have; but there comes a time when it completes its office, and can no longer act, as is evidenced by experience with burial places." That time has quite arrived here, and we can no longer neglect the duty of commanding and enforcing a cessation of the filth saturation system. Five years ago the RECORD-UNION pointed out these things, and warned the city of the inevitable. There is a duty incumbent upon this people now, the neglect of which will just as certainly entail a punishment of the most terrible character, as that days will dawn and nights close in. The agitation now renewed must not be permitted to die out for a day. Mere captious objectors, cranks and fogies must stand aside, and the demonstrations of science, sanitary discovery and experience be heeded and acted upon. There is nothing of the alarmist nature in all this. A revolution in the sanitary affairs of this city must take place, and begin at once.

THE STATION PLAN.

When the RECORD-UNION suggested the other day that the Arctic fever would revive, and new expeditions be demanded, and that a probable plan would be the establishment of frequent stations, and to stock and man them, and keep up a constant connection between a given base of supplies and the furthermost station, the expression was purely speculative. It seemed that some such plan would be advocated. It is now learned that such a proposition is already being debated at the East. As was forecast here, it is urged that it has been demonstrated that men of the temperate zone can live without discomfort in the most northern latitudes, and can make long sledge journeys, if they are kept supplied with fuel, clothing, food and light shelter. The Greely party had neither sickness nor death until the food supply ran out. If there had been a chain of permanent stations, the party would have deemed their excursion no heavy task. It is shown that Arctic discovery is not hereafter to be promoted by vague voyages in ships, and at the mercy of polar currents and ice drifts. All this is reasonable, and the new scheme is possible of execution. But if new enterprises are determined upon, they should be wholly at the expense of private bounty, or by co-operation of many Governments. The Government of the United States should not again engage alone in any Arctic discovery, or Arctic meteorological observation. It is desirable that geographical knowledge should be enlarged; but if it is to be done by official action, the great nations of the earth should be conjoined in the scheme. The expense to each would thus be light, the force engaged large enough to insure the success of the "line-of-stations" plan, and the probing of the mystery of the open polar sea.

THE CAR DRIVERS' CASE.

Grover Cleveland, who stands at the head of a party professing to regard with especial interest the rights of the working man, denied to the hard-worked car drivers of New York that protection they had a right to demand of and expect from the State. They are forced to work sixteen hours per day now. They ask that they be driven by their task-masters but twelve hours, leaving them eight to rest and four for home and relaxation. It was a reasonable request; one that the State should have granted, not only in the interests of the working class, but in the interest of the public. One of these over-worked men writes to a New York paper in these words: "Working sixteen hours a day, men are able to make only five days in a week, or $10, but working twelve hours a day at $1 50 they could work seven days and earn $10 50, and where would be our loss if he had signed the bill? When Governor Cleveland is sleeping in the morning I am at work. When he is attending to his duties during the day I am at work. When he goes to a place of amusement in the evening I am at work, and when he retires to rest at night I am still working. I have a little girl five months old, and during my working days I have never seen her smile, never seen her dark blue eyes, and never held her in my arms awake but twice; and yet this is a Christian land. Governor Cleveland's veto has condemned us to a life in which there is no hope, no joy, and no chance of improvement."

THERE is spreading a story of wonderful gold discoveries in the Andes. The exact locality is not indicated, but some American miners have already set out for the reported new El Dorado. The story grew out of the sudden return to Deadwood of an old miner who had dropped out of memory for a long time. He brought with him some remarkable gold specimens, declaring that he found them at a point eight days travel from the headwaters of the Amazon, and that he discovered the true fissure, which absolutely bewildered him with its richness, but before he could begin work upon it he was driven away by Indians, and he came back to organize a band of skilled miners to return to the spot. Five men joined him and they returned, and send reports of the most wonderful discoveries. American miners have had some severe lessons regarding "new diggings," and there is not likely to be any sudden rush to the Andes. Yet there are many reasons for believing that South American gold fields have not been half explored, or half discovered, and it may remain for the Yankee nation to lay bare the treasures of the continent.

ONE of the speakers at the attempted Democratic ratification meeting at Rochester, N. Y., astonished the officers of the convocation by pronouncing against Gov. Cleveland. The audience gave him the right to be heard, and he so carried the meeting with him that the ratification failed completely. Among other things the speaker said:

> I feel sore to-night, and there is no hypocrisy in me when I say that I do not approve of the nomination of Grover Cleveland. I have fought him from the beginning and I am beaten, and will quietly suffer my defeat like a man. I will not, however, come forward and obsequiously bow and hypocritically say that I am satisfied. [Loud cheers and cries of "Go on; go on; You're right," etc.] No, gentlemen, I am not satisfied. The Democratic party has made another fatal mistake and thrown away the greatest opportunity it ever had for the Presidency. [Loud cries "You're right; that's so."] The record of the party has for the past twenty-four years been one of mistakes and machine rule as the present one has been. I was brought up in the South, where Democrats were Democrats, and I wish to God I could walk back there now.

IT is only common fairness to the editor of the Oakland *Times* to say that he repudiates the telegraphed interview purporting to have been held with him at the East, in which he was reported as declaring that the nomination of Cleveland was a suicidal act by the Democratic party. He avers that no such interview was had, and that he made no declaration of that character, or that could be construed into such expression. This journal compared the alleged expression with the tone of his paper, and pointed out the incongruity. The editor denies the interview, is worthy of belief, and entitled to have his denial made public.

BEFORE the war there was a popular political refrain in Virginia that ran thus:

John Sherman's a devil,
John Letcher's a saint;
John Letcher's a Democrat,
John Sherman—ain't.

For just such doggerel reasons the Higginson-Codman-Curtis bolters leave the house of their fathers, singing:

Jim Blaine is a devil,
And Cleveland's a saint;
Mr. Cleveland's a Democrat,
And Jimmy Blaine—ain't.

THE Independent Republicans of New York in September, 1880—the same now going over to the Democracy—said in an official letter: "The attitude of the Democratic party is wholly negative. Its utterances, together with the use of its majority power in Congress, prove its incapacity to interest itself in any vital political and economic question. There is no hope that Democrats would recommend or undertake the legislation needed to reform the civil service. The spoils system is a Democratic invention, and the hope of the spoil is the stimulus of the Democratic campaign."

IT is encouraging for the republic that Irish-Americans are breaking away from one party and distributing their strength among several parties. This consolidation of one class of citizens with one political party is bad for republican institutions. The Irish do not propose longer to adhere to the plan of putting all the eggs into one basket. Distribution of their votes means a breaking down of clannishness, and the entertainment of a broader spirit of Americanism and citizenship.

THE London *News* says that "the Republicans in nominating Mr. Blaine fell back into the old rut out of which General Garfield had endeavored to lift them." Indeed! But the lever Garfield was using is to-day the nominee of the party for President. The *News* should try again.

THE *Alta* says that there are evidences to show that George Washington had a hand in the writing of Mr. Blaine's letter of acceptance. Is it so? Well, it is gratifying to know that George is on the right side still.

"PARTIES outlive men," declares the *Globe-Democrat*. Yes; and for that very reason the bolt of a few kid-glove Republicans to Cleveland presents them as deserting principles that live for men that pass away.

DOMESTIC NEWS.

The Woman Suffragists and Politics.

NEW YORK, July 31st.—Elizabeth Cady Stanton and Susan B. Anthony, President and Vice-President of the National Woman Suffrage Association, have issued an address to the members, making some suggestions to co-workers, stating "why they should remain steadfastly with the political party that for the last quarter of a century has most faithfully represented the fundamental principles of republican government." The address says: "At the opening of the next session, with our bills and reports waiting their turn on the calendars of both houses, it is to the Republicans we must look for discussion and division on our questions, and did they constitute a two-thirds majority we should confidently hope for the passage of a resolution to submit a sixteenth amendment; but we have nothing to expect from any of the other parties now struggling into existence. As to the Greenback and Anti-Monopoly parties, with their quasi recognition of woman's political equality in their platforms, and the rank and file of seceding Democrats and workingmen who will constitute his supporters, Hon. Benj. F. Butler would be powerless to help us." The Prohibitionists are thus disposed of: "To make woman suffrage the tail to their kite is to defy the laws of gravitation. Prohibition could not secure woman suffrage, but woman suffrage is the only power by which prohibition could be made a possibility. Those demanding the recognition of God in the Constitution are reminded by the address that the best recognition the men of this nation can make of God in the Constitution is to secure exact justice to their mothers. Recently some of our most prominent friends have seceded from the Republican party, who have spoken bravely and eloquently for many years on our platform; but they must not mislead the unwary, as their action has been in no way influenced by their interest in the woman suffrage question. In fact their remarkable sommersault, as far as we can see, is not to illustrate any vital principles, but merely to gratify personal pique. It is not that they hate Cleveland less but Blaine more, that such men as George William Curtis, James Freeman Clark and Thomas Wentworth Higginson have come down from their high moral platform to swamp their votes with the Democratic party. The result of this last secession, were its proportions equal to its virtuous pretensions, would be to throw the administration of our Government into the hands of the Democratic party; not into those of Cleveland, who, though he were possessed of all the cardinal virtues claimed, and in addition the crowning excellence of adhesion to the great principles of political freedom for women, could do nothing for any reform with Congress and a constituency nine-tenths of which are blind and bitter opponents of all labor measures. Suppose, on the other hand, the Republican nominee, James G. Blaine, was wanting in all public and private virtues, with Congress and a constituency, three-fourths of whom are our friends, he could do nothing to hinder the passage of the amendment. But he is friendly. His name stands recorded with the 'ayes' on all questions affecting the interests of woman brought before Congress for many years. Thus, in Mr. Blaine we have a nominee in harmony with the Republican majority in Congress; hence our hope of securing the initiative steps to make suffrage for women the supreme law of the land lies in the triumphant success of the Republican party. For these reasons, as we have no votes to offer, we should give our earnest, conscientious support to the Republican party, whose chosen leader is one of the ablest statesmen our country can boast of, and who, if elected, will, with the noble women of his family circle, honor the White House and the highest office in the gift of the American people."

Hiscock's Views on the Political Outlook.

WASHINGTON, July 31st.—Representative Hiscock, of New York, arrived here to-day and had a consultation with Secretary McPherson, of the Republican Committee. In answer to an inquiry as to the political situation in New York, Hiscock said: "I have no hesitation whatever in saying that Blaine will certainly carry New York. I will not predict what the majority will be, but Blaine is going to have a majority of New York's vote next November."

"What does the Independent movement in New York amount to?"

"It amounts to nothing. It is not taking hold anywhere"

"Does the feeling against Cleveland grow?"

"It does. A great many workingmen throughout the country are becoming afraid of the Democratic party. They do not like its position on the tariff. They see that the Democratic idea of the tariff is dangerous to their interests."

"What will the Democrats in New York, who are opposed to Cleveland, do?"

"I don't think that they will fall in line. I believe that they are going to knife Cleveland."

"Will Blaine be elected?"

"Certainly. It looks as if we are going to carry almost everything."

The Democratic National Executive Committee.

NEW YORK, July 31st.—Chairman Barnum was not present at the meeting of the Democratic National Executive Committee to-day, and Senator Ransom presided. B. B. Smalley, of Vermont, was chosen Secretary. The subject of permanent headquarters was not decided upon.

The Attempted Suicide of Culbertson.

NEW YORK, July 31st.—A *Tribune* special dispatch has the following details of the attempted suicide of Congressman Culbertson, of Kentucky, at the National Hotel yesterday: "Culbertson went to Cape May after the adjournment of Congress and returned here Saturday. His baggage was checked for Kentucky yesterday, and his apparent purpose was then to start himself. In answer to a suggestion by the clerk of the hotel on his arrival that he appeared pale and looked nervous and haggard, Mr. Culbertson said: 'No, I am not well.' To a further suggestion that he was subject to malaria and should try a little brandy, Culbertson said: 'No, that's the trouble now; I've already tried too much of it. I'm trying to shake it off.' Culbertson had remained close indoors at the hotel, and none of his friends knew of his presence here. The bar-tender said to-day: 'Culbertson drank only beer and soda-cocktails, but he had kept up a rather steady pull on these two beverages.' This morning Culbertson presented himself at the office and demanded another room. 'Why, isn't that a good room you have now?' said the clerk. 'No, it opens into the one adjoining, and in there are four men plotting to assassinate me. I've heard all they've said and I know their plans.' The clerk comprehended the situation in a moment. 'Why, certainly, sir,' he said. 'I'll not only give you another room, but I'll go and have those scoundrels driven out of the house. But you are not well and ought to have a doctor. Send for one, won't you?' 'Yes, you are right; I need medicine, and I'll send for a doctor.' The room was accordingly changed, and in half an hour a pistol report was heard."

Important Railway Consolidation.

BOSTON, July 31st.—Details of an important railway consolidation on the Pacific coast have leaked out, and the parties interested admit that the conjunction is effected. The result will be the completion of a rival through line to San Francisco and San Diego. Negotiations were carried on in this city a few weeks ago by C. P. Huntington and ex-Governor Leland Stanford for the Southern Pacific, General Manager C. W. Rogers for the Atlantic and Pacific, and President W. B. Strong for the Santa Fe. By the terms of the new arrangements the Southern Pacific sold to the Atlantic and Pacific (the Santa Fe and the San Francisco lines being really the purchasers) its Mojave Division, 240 miles in length, extending from Mojave to The Needles, and conceded to the Atlantic and Pacific the right to run its trains from Mojave to Oakland pier, a distance of 382 miles. By this contract the Atlantic and Pacific, which is owned jointly by the Santa Fe and the St. Louis and San Francisco lines, extends its road to Mojave and secures the right to run its trains virtually into San Francisco. The California Southern, now reaching from San Diego to San Bernardino, 130 miles, is to be extended to a junction with the purchased Mojave division. It will then be formally transferred to the Atlantic and Pacific, which will thus be extended to the bay of San Diego. This is the first advent in California of a foreign railway company. Heretofore the Central Pacific and Southern Pacific have controlled every mile of the track that led out of or into the State. The Atlantic and Pacific will now enter both San Francisco and San Diego, and to the latter point will own its track. A traffic arrangement will at once be made with the Pacific Coast Steamship Company by which freight can be delivered at San Francisco on the Atlantic and Pacific Company's own terms. The new line will not now enter the field as a rival of the old companies, but as soon as the Transcontinental pool is broken, which will be in less than six months, it is expected there will be trouble.

River and Harbor Improvement.

WASHINGTON, July 31st.—General Newton has received the annual report of Colonel Mendell, of the corps of engineers who had charge of the improvements upon rivers and harbors in California. Appended is a statement of the river and harbor work contemplated, the amount of money available and the amount asked for for the fiscal year 1885-6: Oakland harbor, Cal., increasing tidal prism; amount available, $203,550; amount asked for, $300,000. Wilmington harbor, Cal., dredging sand at the entrance and extending the jetties; amount available, $50,017; amount asked for, $150,000. Sacramento and Feather rivers, destroying snags, scraping bars and building dams; amount available, $250,036; amount asked for, $400,000. San Joaquin river, dredging and constructing restraining barriers; amount available, $30,997; amount asked for, $40,000. Petaluma creek, Cal., amount available, $2,343. Humboldt Bay and harbor, making deep entrance; amount available, $62,581; amount asked for, $200,000.

In reference to the work on the Sacramento river, the report says: The snagboat Seizer, on the Sacramento river, was in commission 175 days during the year, and removed and destroyed 1,138 snags and 35 trees during the past three years, which is the extent of the service of the Seizer. Three thousand three and sixty-four snags have been removed and destroyed, 915 trees felled and five wing-dams have been built over the lines of the Sacramento and Feather rivers and Georgiana slough. It has been remarked in previous reports, and it is now repeated, that the absence of permanent banks capable of resisting the action of the river currents in freshets causes the channel in the river above Colusa to change position, not only from year to year, but often during the same season. If the river could be held between firm banks a permanent improvement would be possible; but the cost of establishing this condition of things is so great that the proposition cannot now be entertained. The most expedient treatment is that now pursued, namely, to maintain in commission during the greater part of the year a boat equipped to destroy snags, to scrape bars and to build wing dams when necessity arises. But for the operations of the Seizer, the river above Colusa would now have become unnavigable, and navigation below Colusa would have been dangerous. It is proposed to continue these operations with the funds asked for in this report. The aggregate of the appropriations made for these rivers, beginning March 3, 1875, is $445,000, of which there has been expended $194,963 34.

Chicago and Monmouth Park Races.

CHICAGO, July 31st.—The first race to-day, one mile, for all ages, Niphon won, Centerville second, Ascoli third. Time, 1:59¾. The second race, mile and an eighth, for maiden three-year-olds, Ahad won, Nodaway second, Scout third. Time, 2:15. The third race, three-quarters of a mile, juvenile stakes for two-year-olds, Celsus won, Courthan second, Lady of the Lake third. Time, 1:23½. The fourth race, one mile, for beaten horses, Australian won, Trix second, Easter third. Time, 1:53¾. The fifth race, half-mile heats, Transition won, Wellington second, P. D. Q. third. Best time, 52¾.

NEW YORK, July 31st.—In the Monmouth Park races to-day the first contest was three-quarters of a mile for all ages. Glideaway won, Caramel second, Pinafore third. Time, 1:19. The second race, Red Bank stakes for two-year-olds, three-quarters of a mile, Chimera won, Guano second, Cholula third. Time, 1:17½. The third race, for the Newark stakes, one mile, St. Savior won, Burton second, Endymion third. Time, 1:48. The fourth race, for all ages, mile and a quarter, Aranza won, Bondholder second, Trafalgar third. Time, 2:20½. The fifth race was selling allowances, one mile. Itaska drew away in the stretch, and won by half a length, Dan K. second, Hartford third. Time, 1:48½. The sixth race was a steeple chase. Charley Epps won, Trombo second, Aurelian third. Time, 3:36.

The Texas Cattle Disease.

CHEYENNE (Wyo.), July 31st.—Last May a band of Texas cattle were herded at Ogallala, 174 miles east of here. The place where they were herded was afterward fenced in, and there a small herd of native cattle contracted the disease. About twenty have died. So far as the Stock Association know, there is no case of affected Texas cattle in the Territory. A band of 100 native bulls which have been grazed at Ogallala are now affected at Rawlins. Twenty-five have died, and the remaining seventy-five are expected to die. As the disease, when contracted by native cattle from the Texans, is not communicable, no fear is felt here. The Union Pacific Railroad pens along the line of the road, and all cattle cars, have been thoroughly cleaned and disinfected.

A Judge Surprised.

LONG ISLAND CITY (N. Y.), July 31st.—Colonel C. B. Waring, on trial for some days for the murder of his brother-in-law, named Freund, was found guilty of manslaughter in the second degree. Judge Bartlett expressed surprise at the verdict, as nothing had been said during the trial of manslaughter in the second degree, yet the verdict must stand. The Judge denied a motion for arrest of judgment, and sentenced Waring to fifteen years in the State Prison and to pay a fine of $1,000.

Gang of Burglars Run to Earth.

PITTSBURG, July 31st.—A gang of burglars, for the past three months operating extensively among the wealthy residents of the East End, were run down to-day by the police, and Alf. Hogan, Sonny Hogan, Charles Hicks and John Scholes (all colored) were captured, together with six large trunks filled with gold watches, diamonds, silverware, sealskin goods, silks, etc., valued at over $10,000. The detectives are still at work, and it is expected that large additions to the stock of goods will be made in the next twenty-four hours. Sonny Hogan, one of the robbers, is believed by the police to be wanted in Washington City for murder.

Destructive Fire.

LITTLE ROCK (Ark.), July 31st.—The *Gazette's* Hot Springs special says: A fire broke out early this morning in the kitchen of Bruen's restaurant, on Central avenue, and spread to the surrounding buildings, destroying nearly the whole block. The guests at the Commercial were forced to fly in their night clothing, losing most of their effects. The fire was soon beyond control of the firemen, and destroyed nearly the whole business part of town. It originated in the explosion of a coal oil lamp. Total loss, $65,000, insured for about one-fifth.

Pilot Boat Run Down and Sunk.

NEW YORK, July 31st.—The German steamer Roma which arrived to-night from Swansea, ran down the pilot boat Washington, No. 22, about three miles east of the light ship. All hands were saved except the cook, James Freeman.

Emancipation Day.

NEW YORK, July 31st.—Emancipation Day will be celebrated by the colored people of New York, Brooklyn and vicinity to-morrow at Myrtle-avenue Park and promises to surpass all previous celebrations. The clubs from New York will go in four-horse carriages and the others in tally-ho coaches. Five thousand tickets have been issued for an excursion to Coney Island.

The Telegraphic Combination.

NEW YORK, July 31st.—The new telegraph combination, consisting of the Bennett-Mackay Cable, the Boston Telegraph, the Baltimore and Ohio and the Bankers' and Merchants', goes into effect to-morrow, the 1st of August. It embraces about 120,000 miles of land wires. The combination is now considering a press rate for newspapers of the whole country.

Negro Murderer to be Executed.

NEW YORK, July 31st.—The negro murderer Jefferson will be executed to-morrow at Brooklyn. Three thousand applications have been made to witness the execution by residents of the City of Churches.

Keene's Property at Newport.

NEW YORK, July 31st.—A dispatch from Newport says: Keene has sold his property here to Mr. Fiske, of New York, for $80,000, which about covers the mortgage of $75,000 and accrued interest. The property includes a handsome lot on Bellevue avenue and spacious conservatories. The fine stabling house was burnt a couple of years ago.

Bridge on the Missouri-Pacific Burned.

AUSTIN (Texas), July 31st.—Brushy creek bridge, an immense span, seventy-five feet high, within twenty-five miles of this city, on the Missouri-Pacific, was burned yesterday afternoon. All trains are blockaded.

Dredge for the Panama Canal.

NEW YORK, July 31st.—The steamer Ione sailed for Aspinwall yesterday, with a massive dredge in tow for use on the Panama Canal. It is warranted to scoop 1,000 cubic yards an hour.

New York Stock Market.

NEW YORK, July 31st.—Central Pacific, 1¼; Burlington, 120¼; Northern Pacific, 22; Northern Pacific preferred, 51⅞; New York Central, 110⅞; Northwestern, 100⅞; Oregon Transcontinental, 13¼; Oregon Navigation Company, 81¼; Pacific Mail, 45⅞; Panama, 98; St. Louis and San Francisco, 17; Texas-Pacific, 11¼; Union Pacific, 46¼; Wells, Fargo & Co.'s Express, 103; Western Union, 61.

NEW YORK, July 31st—Noon.—Stocks buoyant this afternoon, and prices the highest during the present bulge movement. Union Pacific monopolized speculation and rose to 48 on heavy transactions. Western Union sold up to 62, Pacific Mail 46⅞, and Northwestern 104⅞. Near the close there was a reaction of ½ to 2½, but on final sales this was partially recovered.

The Grand Army Reunion.

DAYTON (Ohio), July 31st.—The order of exercises at the reunion of the Grand Army of the Republic to-day was a procession of old soldiers, 200 tattered flags saved from the war being carried by men in the line. The procession was two hours in passing a given point. The soldiers' monument was accepted by Governor Hoadley, on behalf of the citizens, and unveiled amid great cheering.

FOREIGN NEWS.

The Cholera Situation.

MARSEILLES, July 31st.—Of the total number of deaths in France from the cholera this year, probably the great majority died inside of nine hours after they were seized with illness. Some have not died until after being sick a day or more, but the majority of the cases were settled one way or the other within eight or ten hours. At the start there is diarrhea and vomiting. This usually lasts but a short time. Then follow cramps and icy chills, and this stage has commonly been reached by the time the patient has arrived at the hospital. If circulation can then be restored, and be kept up by the use of ten or fifteen grains of acetate of ammonia, the same quantity of alcohol, and by violent rubbing, there is some chance of recovery, though the chance is slight. But if circulation cannot be kept up death is certain. In the last stages some patients are delirious, while others enter into a comatose condition; but the latter part of the disease is generally a frightful thing to behold. It is simply hellish torture. The total deaths in France to date are about 2,300.

MARSEILLES, July 31st.—The lower classes dislike and oppose the physicians because they have the notion that physicians have been instructed to help the cholera along, in order to get rid of the surplus population.

ROME, July 31st.—Six thousand persons are detained in the various lazarettos on the frontier and along the coast.

LISBON, July 31st.—The port of Puelva, Spain, has been declared infected with cholera. The ports between Cadiz and Ayamonte, both inclusive, are also suspected of being infested.

PARIS, July 31st.—There were three cholera deaths at Marseilles and three at Toulon last night.

PARIS, July 31st.—At Marseilles this evening there had been four deaths from cholera since noon. Two deaths from the disease occurred at Toulon to-day. There are no serious cases in the hospitals there, and the fears that the epidemic would break out again are subsiding. One death occurred from cholera at Creux to-day, one at Montford, and one at Susargeus.

MARSEILLES, July 31st.—There is a marked decrease in the number of cholera cases throughout the district. The Municipal Council have resolved to erect a tablet to commemorate the noble sacrifice of the doctors and Sisters of Charity who were victims of the epidemic. Dr. Potraso, who died yesterday, will have a street named after him. There have been seven deaths from cholera in the department Ardechas.

REPORT FROM AN AMERICAN CONSUL ON THE CHOLERA EPIDEMIC.

WASHINGTON, July 31st.—The Secretary of State has received from Consul Mason a long report on the cholera epidemic now prevailing at Toulon and Marseilles. The Consul says, in part: Both Marseilles and Toulon suffered terribly in the cholera epidemic of 1865. During the 19 years which have elapsed since then Marseilles has been in several important respects almost rebuilt. Her pavements, her sewage system, her water supply and method of cleaning the streets, removing the night soil, inspecting and regulating markets, her quarantine regulations and hospital facilities are all probably unsurpassed in excellence by those of any European or American city. The old quarters of the city (ancient Marseilles), which was scourged so sharply by the plague in former centuries, has been pierced with broad avenues, streams of pure water flow down the gutters, the narrower streets and alleys, and the pavements of the principal thoroughfares are washed and swept with frequency, which leaves nothing to be desired. As there is no tide to maintain the circulation of the sea water through the inclosed ports, the inevitable result is that the latter grow foul and pestilent. The same conditions, unmitigated by equally vigorous sanitary measures, prevail at Toulon, and it is thought that it was the dredging of a disused dock there, during the months of April and May, which developed the seeds of the present epidemic. In spite of this, a number of deaths have occurred in the cleanest and handsomest portions of Marseilles. The attack of cholera has been this year far more vigorous and fatal than in the great epidemic nineteen years ago, and all the present indications point to a summer of gloom and suffering for the people of Toulon and Marseilles. All that energy and liberality could perform, all that sanitary science could suggest, has been done; but the pestilence is here, and defies restraint. The present situation may be summarized as follows: The epidemic which now prevails at Marseilles and Toulon is Asiatic cholera, imported, beyond all reasonable doubt, from Saigon, China, from the French port of Surthe to the port of Toulon. At first the disease was of a type medically classified as "benign," but its malignity has since increased by its further diffusion and development under the influence of the continued hot weather. In compliance with instructions from the Department this Consulate has ascertained from official searches that no emigrants have recently left either Toulon or Marseilles by sea for the United States. It should be added, however, that few emigrants for American ports ever embark here, as the steamers leaving Marseilles usually touch at one or more Mediterranean stations before leaving their final point of departure, and emigrants usually go by rail to this ultimate port of departure, to embark for the United States. It is therefore suggested that all vessels bringing emigrants or baggage to the United States from Bordeaux, Havre, La Rochelle, or any other French port not yet declared infected, should be subjected, upon their arrival, to the most careful sanitary regulations. Clean bills of health have been refused at this Consulate to all vessels clearing for ports in the United States since the 25th of June, and none such will be granted until Marseilles is officially declared free from the contagion.

The Laxham-Gijon Collision.

MADRID, July 31st.—Captain Newton, a passenger on the steamer Laxham, which was sunk after the collision with the steamer Gijon, escaped with fifteen Spaniards and landed at Muros. He reports that immediately after the collision the Captain of the Gijon shot himself. The Spaniards, he said, behaved badly. There is no news of the Captain of the Laxham.

Prisoners Killed by Soldiers.

CITY OF MEXICO, July 31st.—Under the law soldiers are permitted to kill persons who resist arrest, or after being captured attempt to escape. The revolutionary forces in Guerrero were recently attacked, and General Pinzon, with six soldiers who were taken prisoners, were killed while attempting to escape. Two General officers were also killed in Yucatan.

Will Abdicate.

BERLIN, July 31st.—It is reported that Grand Duke Louis of Hesse will abdicate in favor of his son Ernest, under the advice of the Emperor of Germany. His morganic marriage with Mme. Kolarmine and the subsequent divorce compromised his position.

Captured by Brigands.

CONSTANTINOPLE, July 31st.—Seen, British Vice-Consul at Rodesto, has been captured by brigands, who demand £7,000 ransom.

Suakim Attacked by the Rebels.

SUAKIM, July 31st.—The rebels attacked Suakim last night in great force. They lost four men killed and had several wounded. The thermometer registers 120° in the shade, and many sunstrokes have occurred among the troops.

Carl Schurz continues to flock all by himself. He is excellent company by himself this warm weather. Both he and himself are on such good terms with Schurz.—[Philadelphia Press.

Arkansas furnishes the largest percentage of farmers, 83.1, and Massachusetts the smallest, 9 per cent. Georgia has the greatest number of agricultural workers, 432,204; Wyoming the smallest, 1,639.

The Art of Prolonging Life.

"To die of old age" is the object of ambition to a large number of persons, who carefully nurse their health with the view, not of escaping death altogether, for they know this to be impossible, but of eking life out to its utmost limit. The art of prolonging life in this fashion appears to be less well understood now than formerly. The Registrar-General, in his report for 1882, lately published, observes that the deaths ascribed to old age have for many years been diminishing in their proportion to the population, and in 1882 were fewer in proportion than in any former year. As old age is the natural termination of life, and the ailment of which all prefer eventually to die, this aggregate falling-off in the mortality from this cause, if real, would not be an indisputable advantage. But doubtless much of the falling off under this heading is merely due to gradual improvement in the specification of the causes of which the old die. This, however, does not account for all the apparent decline in the mortality. For there was in each of the three years, 1880, 1881 and 1882, a sensible decline in the mortality of persons of advanced age from all causes; and in 1882 especially the death rate of persons fifty-five years of age and upward, whether males or females, was lower than it had been for many years, probably than it had ever been before. The main factor that determines the death rate of the aged is temperature of the winter months; and in 1882 the mean temperature of each of the six months of the first and fourth quarters was above the average. In fact, the best advice that can be given to old people anxious to linger on in this planet is, "Keep yourselves warm."—[St. James' Gazette.

CONSTITUTIONAL AMENDMENTS

STATE OF CALIFORNIA,
EXECUTIVE DEPARTMENT.

Pursuant to the Constitution of the State of California, and an Act of the Legislature of the State of California entitled "An Act to provide for the submission of proposed amendments to the Constitution of the State of California to the qualified electors for their approval," approved March 7, 1883, notice is hereby given that the Legislature of the State of California, at its twenty-fifth session, commencing on the first Monday after the first day of January, A. D. 1883; two-thirds of all the members elected to each of the two Houses of said Legislature voting in favor thereof, proposed that Section 19 of Article XI. of the Consitution of the State of California, be amended so as to read as follows:

Amendment No. 1.

SECTION 19. In any city where there are no public works owned and controlled by the municipality for supplying the same with water or artificial light, any individual or any company, duly incorporated for such purpose under and by authority of the laws of this State, shall, under the direction of the Superintendent of Streets, or other officer in control thereof, and under such general regulations as the municipality may prescribe for damages, and indemnity for damages, have the privilege of using the public streets and thoroughfares thereof, and of laying down pipes and conduits therein, and connections therewith, so far as may be necessary for introducing into and supplying such city and its inhabitants either with gaslight or other illuminating light, or with fresh water for domestic and all other purposes, upon the condition that the municipal government shall have the right to regulate the charges thereof.

And notice is hereby further given, that at the same session two-thirds of all the members elected to each of the two Houses voting in favor thereof, the said Legislature proposed that Section 7 of Article IX. of the Constitution of the State of California be amended so as to read as follows:

Amendment No. 2.

SECTION 7. The Governor, Superintendent of Public Instruction, and the Principals of the State Normal Schools shall constitute the State Board of Education, and shall compile, or cause to be compiled, and adopt a uniform series of text books for use in the common schools throughout the State. The State Board may cause such text books, when adopted, to be printed and published by the Superintendent of State Printing at the State Printing Office, and when so printed and published, to be distributed and sold at the cost price of printing, publishing and distributing the same. The text books so adopted shall continue in use not less than four years; and said State Board shall perform such other duties as may be prescribed by law. The Legislature shall provide for a Board of Education in each county in the State. The County Superintendent and the County Boards of Education shall have control of the examination of teachers and the granting of teachers' certificates within their respective jurisdictions.

And notice is hereby further given that the Legislature of the State of California, at its twenty-fifth (extra) session, commencing on the twenty-fourth day of March, A. D. 1884, two-thirds of all the members elected to each of the two Houses of said Legislature voting in favor thereof, proposed that Section 9 of Article XIII. of the Constitution of the State of California be amended so as to read as follows:

Amendment No. 3.

SECTION 9. A State Board of Equalization, consisting of one member from each Congressional District in this State, as the same existed in eighteen hundred and seventy-nine, shall be elected by the qualified electors of their respective districts, at the general election to be held in the year one thousand eight hundred and eighty-six, and at each gubernatorial election thereafter, whose term of office shall be for four years, whose duty it shall be to equalize the valuation of the taxable property in the several counties of the State for the purposes of taxation. The Controller of State shall be ex officio a member of the Board. The Boards of Supervisors of the several counties of the State shall constitute Boards of Equalization for their respective counties, whose duty it shall be to equalize the valuation of the taxable property in the county for the purpose of taxation; provided, such State and County Boards of Equalization are hereby authorized and empowered, under such rules of notice as the County Boards may prescribe, as to the county assessments, and under such rules of notice as the State Board may prescribe as to the action of the State Board, to increase or lower the entire assessment roll, or any assessment contained therein, so as to equalize the assessment of the property contained in said assessment roll, and make the assessment conform to the true value in money of the property contained in said roll; provided, that no Board of Equalization shall raise any mortgage, deed of trust, contract or other obligation by which a debt is secured, money or solvent credits, above its face value. The present State Board of Equalization shall continue in office until their successors, as herein provided for, shall be elected and shall qualify. The Legislature shall have power to redistrict the State into four districts as nearly equal in population as practical, and to provide for the elections of members of said Board of Equalization.

Each amendment shall be voted upon separately from the others, by ballot, at the next general election, to be holden on TUESDAY, the 4th day of NOVEMBER, A. D. 1884. The ballots used at such election shall contain the words: "For the Amendment No. 1," or the words "Against the Amendment No. 1;" "For the Amendment No. 2," or the words "Against the Amendment No. 2;" "For the Amendment No. 3," or the words "Against the Amendment No. 3," written or printed thereon.

LOCAL INTELLIGENCE.

THE SACRAMENTO DEMOCRACY.—In pursuance of a published call about one hundred Democrats assembled at Turner Hall last evening to perfect the organization of a Cleveland and Hendricks Club, which was commenced Saturday evening last at the new pavilion. Henry M. Bernard called the meeting to order, made a vigorous Democratic speech, and asked for the nomination of a chairman. Dr. H. L. Nichols was placed in nomination by R. O. Cravens and unanimously elected. W. S. Leake was elected Secretary, and H. B. Nielsen Treasurer. The balance of the officers selected were as follows: Vice-Presidents, First Ward, Mark Foster, Jacob Nagle, B. F. Huntley; Second Ward, D. J. Considine, M. Cronan, J. L.Chadderdon; Third Ward, John Yougg, Thos. Grrdner, James M. Groth; Fourth Ward, Daniel Brown, S. B. Lusk, H. M. Bernard. Executive Committee at large, Jerry N. Payne; First Ward, Samuel Johnson and Mark Foster; Second Ward, Isaac Moore and A. Gornett; Third Ward, G. W. Carey and Robert O. Cravens; Fourth Ward, E. G. Blessing and B. Keirnan. G. W. Carey offered the following, which was voted down: "Resolved, that this meeting request the Democratic County Central Committee not to call the Convention before the last week in September." Speeches were made by Colonel J. J. Ayers, Francis Carr, of Shasta, and others. At the close of the meeting several signed the roll. The Young Men's Democratic Cleveland and Hendricks Club met in the Courthouse last evening. The meeting was well attended. Thirty-six new names were added to the roll, making a total membership of 108. When they adjourned they marched to Turner Hall in a body, and were received by the other club with cheers.

HE STOLE A CROSS.—One would suppose that the last thing in the world a thief would covet would be a gravestone. Sacramento can, however, boast of a thief who has no compunctions of conscience or scruples in that direction, for a theft of that kind was committed at Israel Luce's marble works, J street, on the night of Wednesday. In the front portion of the marble works is a room fenced from the street by a slight railing, in which are deposited statuary, monuments and various styles of gravestones. Among the lot was a beautiful Italian monument, on the top of which was, morticed in, a beautiful cross of exquisite workmanship. The thief clambered over the fence, pulled the cross off, breaking the mortice in the monument in so doing, and departed with his plunder. Mr. Luce has an idea who committed the theft, and has put an officer on his track. A gentleman who was talking with Mr. Luce regarding the matter said he recollected a similar theft having been committed in the City Cemetery some seven years ago. In that case a dove was stolen from the top of an elegant and costly monument, but several days afterwards was mysteriously returned. Mr. Luce says he knew all about the circumstances, which were as follows: "One of my workmen used to make doves and small figures at home evenings, and would receive therefor pay for over time. One day he came to me intoxicated, and offered to sell a dove. I noticed that it was not new work, and also that it had been stained from lying on the grass. I at once made up my mind that he had stolen it, accused him of so doing, and advised him to return it immediately. I am satisfied he did so that night, as the next day I heard that it had been returned. Poor fellow, he is dead now."

LOOK OUT FOR THE NEW COUNTERFEIT.—A new counterfeit $10 silver certificate has appeared in the Western States. It is supposed to have been printed from a wood cut, but it is likely to deceive ordinary judges of money. It is of the series of 1884; G. W. Scofield, Register; James Gilfillan, Treasurer. The note is one-quarter of an inch shorter than the genuine. The paper is composed of two thin layers, with silk parallel lines of fiber between them. In the star on the back, where it should read, "and all public dues and when so received," the word "all" is entirely omitted, and the words "when so" are run together as one word. There are numerous other defects which judges of paper money will readily discover.

POLICE COURT.—In the Police Court yesterday, James Mehan was convicted of battery, and was ordered to appear this morning for judgment......John Perry and Mrs. Perry were tried for disturbing the peace. He was acquitted, but she was convicted, and will be sentenced to-day......John Doe and Martin Collin, charged with having been drunk, forfeited their deposits......E. C. Carr, also arrested for having been drunk, was discharged......Peter Essick was found guilty of misdemeanor and fined $5......Mike Bennett, charged with cruelty to animals in over-driving a livery horse, was found guilty, and will receive judgment to-day......Louis Wright, charged with disturbing the peace, was released on payment of costs.

NEW CITIZENS.—The following persons were admitted to citizenship in the Superior Court yesterday: Henry Hauck, a native of Germany, on the testimony of Martin Steinmetz and Robert Riecken. Vicenzo Di Sano, a native of Italy, on the testimony of Martin Morelli and A. Caselli. Patrick York, a native of Ireland, on the testimony of John York and Dennis Burk. Henry Iverson, a native of Norway, on the testimony of Frank Schuler and J. L. Chadderdon. Robert Riecken, a native of Germany, on the testimony of George Bernhard and Martin Steinmetz.

PLAYING BOY.—Three girls, about 15 years of age, two dressed in male attire, were having a frolic in Capitol Park yesterday afternoon, attracting considerable attention, when special officer Ferrall stopped the amusement by advising the two that were masquerading that they were liable to arrest, and must go home and don their proper garments. One of them, who had her dress on beneath the other clothing, stepped beneath the low branches of one of the trees, and soon reappeared as a good looking young lady; but the other had to go home to make her toilet.

THE McCLOUD FISHERY.—Fish Commissioner Buckingham received a dispatch yesterday from Livingston Stone, United States Fish Commissioner, inquiring whether the California Fish Commission desired to take and hatch salmon eggs at the McCloud river fishery at their own expense. Mr. Buckingham responded that he thought the Commission would be pleased to do so, but before saying positively he would have to confer with the other members of the Board.

SUIT COMMENCED.—The people ex rel. John P. Dunn, through the Attorney-General, have brought suit against Frank W. Gross and his bondsmen, John Martin and John Landers, to recover $2,880 20, money which, it is alleged, Gross collected while Clerk of the Supreme Court, from January, 1880, to January, 1883, and which he refused to pay into the treasury. The defendants, Martin and Landers, are on Gross' bond for $10,000.

City Sewage.

EDS. RECORD-UNION: I have read, with the interest of an old citizen, the report in the RECORD-UNION of the combined meeting of the city authorities and Citizens' Association, called to discuss sanitary matters, and ask the use of your columns to present some views in opposition to those advanced at this meeting. After years of effort our people have voted an appropriation to begin a much-needed work of drainage and sewage reform. In so important a matter, involving sooner or later the expenditure of hundreds of thousands of dollars, it would seem right to present various plans to property-holders, and that one should be adopted which, in the opinion of sanitary engineers, offers the safest and least objectionable features. To pump the filthy sewage of 25,000 people directly into a river from which they get all their water, is a very old plan, once universally adopted, but now as universally condemned by sanitary authorities everywhere. Medical literature is full of instances where the valleys of rivers have been rendered almost uninhabitable by the drainage of inland cities, and epidemics of low fevers have often been traced to the minutest quantities of sewage matters found in such drinking waters; and yet with such facts before us our Trustees and Board of Health urge the adoption of this effete plan, which at least risks the purity of our own water supply and throws upon our river neighbors below us a frightful cause of disease and death. Even if they avoid drinking the water, it is certain that during low stages of the river the sewage will be deposited along the banks and the air will become vitiated and low fevers will result.

In protesting against such a disposition of our sewage, my reasons are not alone to avoid river pollution, but are mainly to urge upon our citizens the adoption of a plan to epurate our sewage by irrigation and agriculture. Our city is most favorably situated to put such a plan in active operation. We have at our doors the poor land which would become immensely valuable and profitable when flooded by our lifted sewage. It would be no experiment to try the project, for the system is already in successful operation in two hundred cities and towns in England, and experience has shown that sewage farms are very healthy. Further, the plan will return to the city or its owners a fair rate of interest upon the necessary investment. I cannot better close my writing upon this point than by quoting the following item from a late sanitary journal:

"Leamington, with 26,000 inhabitants, spent $40,000 in chemical experiments, after which the A B C Company in 1869 attempted to purify the sewage, but gave it up in 1871. It was then allowed to flow into the river Leam. A lawsuit followed, costing the city $25,000, in which it was defeated, and compelled at an expense of $7,500 more to purify the river. Lord Warwick then consented to receive the sewage upon his estate, the city contracting to deliver it at the highest point of the farm for a period of thirty-two years, for which Lord Warwick engages to pay $2,250 annually. The sewage amounts to a little over 1,000,000 gallons per day, and is distributed over the land which has not been leveled by what is known as the 'donkey-back' system—elevated open drains, on the sides of which is the vegetation. It has transformed the poorest parts of the farm into soil of much fertility, and financially has proved a great success. From eight to nine cuts of Italian rye grass two feet high are made each year; celery, strawberries and currants grow remarkably well. The beef, milk and butter are in great demand and bring the highest prices. The laborers are in the best of health, and Lord Warwick has received numerous prizes for one of the best-kept farms in the Kingdom."

So far as our present drainage canal is concerned, I cannot agree with the Board of Health that it should be abandoned, even if our sewage is otherwise provided for. For a great portion of its length it follows a natural water-course, and will always assist in doing a good work for surface drainage for the low portion of our city. The right for its use was acquired at much cost and trouble, and it only needs ordinary care and cleaning to render it particularly useful at certain seasons of the year. If our authorities will order the hundreds of thousands of gallons of water now being uselessly thrown into China slough to be turned into the sewers which open into this canal, the lazy current will begin to move, and the foul matters will become so diluted that they will be less unhealthy. CITIZEN.

BROUHT FROM THE NEEDLES.—Two men who had been engaged in rebuilding a railroad bridge at The Needles, and were taken suddenly ill, as were numerous others, as mentioned in yesterday's telegraphic dispatch to the RECORD-UNION, were yesterday brought to the Railroad Hospital. Several other members of the party of workmen were taken to Oakland. The men in the hospital here are doing well. They appear to be suffering from the effect of exposure to a very hot sun. The *Bulletin* of last evening had the following in reference to the men taken to Oakland: "A party of railroad men arrived at Oakland this morning from The Needles, bringing the body of William Abner McKean, the foreman, who died two days ago. The men tell a pitiful story of sufferings and sickness from the intense heat. They were engaged in rebuilding the bridge destroyed by the washouts. They left Oakland about two weeks ago. Several were taken sick almost immediately, and later were prostrated by the intense heat. Two men died—the foreman, McKean, and J. J. Crow. Just before the party left, six men were prostrated suddenly and almost at the same time. They were carried into a train and bathed and rubbed while the cars were moving northward, but they did not revive until the train reached Mojave. McKean and Crow both died very suddenly. While working they fell to the ground in a semi-unconscious state, and died within an hour. Some of the men at work live in Oakland, and their wives and families are very anxious for their safety. Dr. Woolsey made an examination of the body of McKean this morning, and pronounced sunstroke the cause of death."

BODY RECOVERED.—The body of John Miller, who was drowned while swimming last Sunday a few miles below the city, as heretofore published in the RECORD-UNION, was found yesterday about a mile above Clarksburg. Justice Bright, of Washington, held an inquest, the jury returning a verdict of accidental drowning. The remains were taken in charge by W. J. Kavanaugh, undertaker, who embalmed them to stop further decomposition—the body was badly swollen, but not disfigured so as to be unrecognizable. A letter having been received from a lady of San Francisco, requesting to be notified when the body was recovered, as she believed the deceased was her husband, the remains were taken by Mr. Kavanaugh to his undertaking rooms, and placed in the basement preparatory to being put on ice. Before this could be done, however, the intensely offensive odor caused the people of the neighborhood to rise in indignation, and the Health Officer was sent for. That official directed that prompt measures be taken to remedy the evil, and was informed that when the body was covered with ice the odor would cease.

AUCTION SALES.—Bell & Co. will sell at auction to-day at 10 A. M., at the residence No. 804 K street, between Eighth and Ninth, all the furniture and household goods, including 1 large plate-glass mirror, 1 parlor set of 7 pieces, walnut bedstead and mattress, cottage set and spring mattresses, center table, 4 parlor stoves, cutting table, wardrobe, bed lounge, White sewing machine, hall lamp, safes, crockery, etc. Sale positive......The same firm will sell to-morrow, at 10 A. M., at their salesroom, Eighth and K streets, six Brussels carpets, two wardrobes, kitchen safes, elegant bed lounge, costing $35; walnut bedsteads, three-quarter and double; spring and top mattresses, Wilson sewing machine, large easy chair, solid walnut bookcase, No. 7 Flora range, camp and arm rockers, etc. At the commencement of the sale there will be disposrd of a fine solid, newly-covered, walnut bedroom set, marbletop, with plate glass mirror and spring and top mattresses. The firm will also sell during the morning a fine dark bay work horse, eight years, works single or double.

YESTERDAY'S WEATHER.—The temperature, wind and weather at 12 M. yesterday, says Sergeant Barwick, was: For Olympia, 68°, north and fair; Portland, 70°, north and clear; Fort Canby, 61°, west and fair; Roseburg, 77°, north and clear; Mendocino 53°, north and foggy; Red Bluff, 94°, northwest and clear; Sacramento, 78°, south and clear; San Francisco, 60°, west and fair; Los Angeles, 80°, west and clear; San Diego, 72°, west and clear; Salt Lake, 90°, southeast and clear; Cheyenne, 79°, northwest and clear; Denver, 85°, north and fair; North Platte, 83°, southeast and clear; Omaha, 77°, north and clear; Yankton, 81°, southwest and clear.

BRIEF NOTES.

Two carloads of immigrants arrived from the East this morning.

The Sacramento river was last evening down to 11 feet 6 inches.

The close season for salmon commences to-day, and lasts a month.

Entries for the State Fair races, and for all the races of the circuit, close to-day.

Thirty carloads of tea went East yesterday morning by special train from San Francisco.

The steamer San Joaquin No. 2 sailed for San Francisco yesterday with grain and merchandise.

The Arcata and Mad River Railroad has increased its capital stock from $60,000 to $300,000, divided into 15,000 shares of $20 each.

A carload of Chinamen came through from the East on the immigrant train yesterday morning. Most of them are going to China.

The road through Cache creek canyon to Lower Lake is in condition for use, but the stage line from Woodland has not yet resumed business.

The latest report is that the pay car is going South before visiting Sacramento, and will pass through Lathrop, going down, to-morrow.

The Prohibitionists will hold a ratification meeting at the Y. M. C. A. Rooms this evening. Speeches will be made by prominent members of the party.

Last Wednesday it was noticed that all the Sacramentans leaving for watering places were going to Santa Cruz. Yesterday all were bound for Monterey.

The funeral of Herman Dohn, a well-known musician of this city, and also a member of the Sacramento Turn Verein, will take place from Turner Hall at 2 P. M. to-day.

Coroner Clark was unable yesterday to obtain any further information relative to the man whose remains were found in the river below Courtland two or three days ago, as mentioned in our last issue.

The steamer Alvarado was yesterday doing service for the Capital Packing Company, bringing up fruit from the lower Sacramento, the steamer Margie being disabled in consequence of some of the flues of her boiler leaking.

Mrs. Caroline Cadwalader died at the residence of her daughter, Mrs. R. N. Graves, in San Francisco, yesterday, aged 74 years. Deceased was the mother of the late George and Edward Cadwalader, and of General Charles Cadwalader, of Red Bluff.

Bartley Cavanaugh, who is spending his vacation at Lake Tahoe, sends every few days a box of "speckled beauties" to his friends, claiming to have caught them with hook and line. As all the trout bear evidence of having been speared, Cavanaugh's friends are of the opinion that he is fishing with a silver hook.

A prisoner in the Police Court a day or two ago pleaded that he was not drunk when arrested, but was only "looking for the street." The officer who took him in was of the opinion that he could not see the street because of the bad conduct of the sidewalk, which kept rolling and tumbling about, and tipping up at the edges.

Precinct Four and a Half Blaine and Logan Club met Wednesday evening at the corner of Eighteenth and M streets, in the store of George Lichtbardt, and elected permanent officers as follows: President, B. N. Covell; Vice-President, Robert Millar; Secretary, John Shannon; Assistant Secretary, N. J. Toll; Treasurer, George Neal; Sergeant-at-Arms, Henry Garrett. Mr. Lichthardt is fitting up a hall for the use of the club, which will be ready for occupancy on the 6th of August—next meeting night. The club has already a membership of over thirty on the roll.

Cleansing China Slough.

EDS. RECORD-UNION: I applaud all efforts to benefit the sanitary condition of Sacramento city, but think it would be better to pump the stagnate water out of the slough and let fresh water seap in; but believe the only correct plan to accomplish the objective—to have the water remain pure winter and summer—would be to lay a drainage pipe in the alley between H and I, from the slough to the river, at low water mark, with a proper gate to close it when the river is higher than the slough. Before this slough was leveed in there was a continual stream running out of the slough into the river all summer, between the old water works and the bridge. Then the water was never bad, nor would it be now if it could run out as the river falls. J. D.

FIRE COMMISSIONERS' MEETING.—The regular monthly meeting of the Board of Fire Commissioners was held last evening, all the members being present. Minutes of the previous meeting were approved. On motion, the pay-roll for the month of July for $1,525, was duly allowed and ordered paid. On motion, the following bills were allowed and ordered paid: H. M. Bernard $20 50, D. McCarty $38 65, Gutta Percha Rubber Company $7, James McClatchy $2, Sacramento Lumber Company $9 35, Continental Oil Company 90 cents, C. McCreary & Co. $8 22, Dale & Co. $11, A. Dennery $3, Charles Zeitler $5 55, Bee Hive Store $1 50, C. H. Krebs $7 50, Wiesel & Son $2 50, Nixon & Wheeler $5, C. Sullivan $28, Myers & Barber $49 80, Mint Brass Works $15 75, C. E. Adams $11, J. C. Chadderdon 75 cents, California Wire Works $1 22, Friend & Terry Lumber Company $1 33, R. A. Fisk $25, D. O. Cook $7 70, C. Nelson $2 25, Whittier, Fuller & Co. $3, Charles E. Berry $100, R. S. Jones $8 25, P. J. Coffey & Son $7, M. McElaney $15, Capital Gas Company $11 70, Huntington, Hopkins & Co. $1, J. P. McManus $2 10, C. A. Gillespie $45, L. B. Smart $75. Reports of the different foremen on fires and alarms for the month of July were received and placed on file. No further business, the Board adjourned.

CHANGE IN STUDIES.—Sacramento is not alone in revising the course of study in its high school and permitting less prominence to be given to the study of the dead languages. Several such revisions have recently in high schools and colleges been noticed, and among them Harvard College, of which the Chicago *Current* says: The faculty of Harvard College have so modified the course for the degree of Bachelor of Arts that the freshman class of next year will not be required to study in college either Greek, Latin or mathematics, though all will be demanded at the entrance examinations. Next year the prescribed studies of the freshmen will be rhetoric and English composition, German and French, physics and chemistry. They will also have the privilege of choice for the first time, and will be required to choose three full courses. The effect of the change is to relegate Latin and Greek, particularly, to positions of secondary importance.

WHERE ARE HIS RELATIVES?—John Talbot, Central Pacific ticket agent at Sacramento, received the following dispatch from T. H. Goodman, San Francisco, last evening, which is self-explanatory: "General Ticket Agent Stebbens, U. P. R. R., wires us as follows: 'Bright boy, 12 years of age, here, named Joseph Franklin, from Brooklyn, N. Y. Father and mother died there. He is trying to reach Sacramento. Had $25 to start with, which he paid conductors as he came along; now out of funds. Please see if his brother, Frank Franklin, Front street, Sacramento, or his sister, Mrs. O'Brien, same city, will pay his fare and $5 for expenses. Please see if you can find the parties named, and wire us their wishes in the matter.'" So far Mr. Talbot has been unable to find the parties referred to.

OPEN-AIR CONCERT TO-NIGHT.—The Hussar Band will give an open-air concert in Capitol Park this evening, commencing at 8 o'clock. Music will be discoursed as follows: Quick march, "Hercules," Brown; overture, "Tournament," Boyer; "Yankee Doodle Polka," J. Levy; overture, "Babes in the Wood," Boyer; waltz, "Ellenoren," Boyer; overture, "Peek-a-Boo," Watson; "Concert Galop Illusion," Roger; "Auld Lang Syne."

FOUND IN A BOTTLE.—Two or three days ago a son of local officer May found a corked bottle floating in the river, and on opening it saw a scrap of paper—portion of the label of an oyster can. On this was written in pencil: "I, William Jacob, drowned myself in A. M. Riv. May the 12th, near 12th st. bridge. I act thus on account of desease." It may be that this refers to the unknown man found in the river below Courtland early this week.

PRISONER EN ROUTE.—Constable Benjamin Colburg, of Stockton, brought up from San Francisco last evening a prisoner named Wm. Lutje, whom he is conveying to Nevada City, to answer for an assault to murder. He is an escape from the jail at that place.

ARRESTS.—The following arrests were made yesterday; Lewis Wright, by officer Rider, for disturbing the peace; Sam Low, by Chief Jackson and officer Rider, for battery; Jim Flanigan, by officer Ash, for disturbing the peace.

REGISTRATION
—AND—
Naturalization!
ROOMS OF REPUBLICAN COUNTY COMMITTEE, SACRAMENTO, July 21, 1884.
The attention of voters is called to the importance of
Registration and Naturalization.
No man will be allowed to vote at the election this Fall, unless he has received his naturalization papers at least NINETY DAYS prior to the day of election. The latest date, therefore, in which naturalization papers can be taken out, to entitle the holder to vote, is AUGUST 5, 1884. Republicans throughout the county should give this immediate and constant attention, that there may be no votes lost.
Section 1 of Article II. of the State Constitution, says: "Every native male citizen of the United States; every male person who shall have acquired the rights of citizenship under or by virtue of the treaty of Queretaro, and every male naturalized citizen thereof, who shall have become such ninety days prior to any election, of the age of twenty-one years, and shall have been a resident of the State one year next preceding the election, and of the county in which he claims his vote ninety days, and in the election precinct thirty days, shall be entitled to vote at all elections which are now or may hereafter be authorized by law."
The Republican County Committee have established Headquarters at the office of Hart & White, Attorneys-at-law, upstairs in the Sutter Building, at the southwest corner of Fifth and J streets, Sacramento, and have appointed Lincoln White to furnish all necessary information to persons who desire to vote the Republican ticket relative to naturalization, transfer of registration from other counties, and registration.
The Headquarters will be open from 9 A. M. to 5 P. M., and from 7 to 9 P. M. each week day: and from 1 to 3 P. M. on Sundays for that purpose.
No person will be allowed to vote whose name is not upon the Great Register of the county THIRTY or more days prior to the day of election. Persons removing from other counties into this can procure transfers, and should do so without delay, as the time is short.

30 DAYS' TRIAL.

AS THE SOLE MANufacturer of Horne's Electric Belts, I warn the public to beware of the recklessly false statements that "C. N. Wes * * *" discarded the same. He could not possibly do so, since he never manufactured such Belts. Years ago I sold West's Belts, but discarded them on account of their defective electric construction. My NEW IMPROVED ELECTRIC BELTS are superior to any electric or galvanic belts in America in curing diseases without medicine. W. J. HORNE, Inventor and Manufacturer, 191 Wabash avenue Chicago: 702 MARKET STREET, San Francisco.

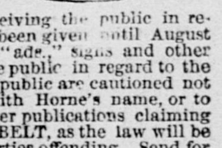
CAUTION.



C. N. WEST HAS been granted an injunction against W. J. HORNE preventing him from calling the Electric Belt WEST patented, "Horne's Belt," or deceiving the public in regard to it. Horne has been given until August 1st to withdraw all his "ads," signs and other modes of deceiving the public in regard to the facts in the case. The public are cautioned not to buy belts stamped with Horne's name, or to receive circulars or other publications claiming to represent HORNE'S BELT, as the law will be enforced against all parties offending. Send for my new Improved Belt, superior to all others in the world. It has taken silver medal and will cure all diseases. Sent C. O. D., or for cash: price, $10. Send for circulars to C. N. According to the *Farmers' Gazette*, of Dublin, the total meat product of the United Kingdom is about 1,100,000 tons from cattle, sheep, and swine, and that this cannot be increased, as it has not materially varied for the last twenty years. At present rate of consumption this would supply 26,000,000 of the population, leaving 9,000,000 dependent upon the importations from other countries. Last year the percentage of supply from abroad was 28 to 72 of the home product.

The Bonanza King mine, of Providence Mountain, Los Angeles county, has paid $150,000 in dividends during the past year.

Mr. Campbell, at his hydraulic claim at Quartz valley, Siskiyou county, will clean up not less than $50,000 for this summer's work.

The Oriental Mill at Calico is making improvements that, when finished, will make the mill the best equipped in the country.

One hundred and fifty dollars to the pan is being cleaned up on the bedrock of the Pioneer mine at Gross Flat, Downieville, Sierra county.

In the Hunter mine, in Sierra county, there is a vein two and a half feet in width, and for a distance of fifty feet, as far as tested, pays from $18 to $20 per ton.

Many paying mines are everywhere being developed in the surrounding hills and mountains of Inyo county, and mills and furnaces are being started up all through the county.

On Wednesday last, while the men were grading to get a foundation for the new blacksmith shop near tunnel No. 2 of the Melton mine, Grizzly Flat, says the Placerville *Mountain Democrat*, a new chute of ore was unearthed which prospects splendidly. Several tons of the ore has been taken out, which looks better than that taken from near the surface at any other point.

PACIFIC COAST ITEMS.

The real and personal property assessment of Los Angeles county has increased $5,000,000 the past year.

It is estimated that there are forty thrashing machines at work in Los Angeles county six days in the week, turning out 75,000 bushels of grain daily.

Father Prando, who has reached Salt Lake from the Blackfoot Agency, says many of the Indian lodges are without a child remaining and some with but one man.

The Los Angeles *Herald* says that the loss of the Muscat is only on the high mesas. The rich plains of Orange and Santa Ana, which are less than 300 feet above the sea level, do not give evidence of any loss.

The honey yield in Ventura county is immense and of the very best quality. It is estimated that it will reach sixteen hundred tons or nearly three and a quarter million pounds. There are nearly 9,000 bee colonies in Ventura county.

John T. Caine, the Mormon delegate to Congress, concluded a discourse at Salt Lake, Sunday, by saying: "I believe there are some men in Congress whose hatred of the Mormons is so strong that they would actually stand complacently by and see many of our people burned at the stake."

Following is a list of the placer canyons of Los Angeles county: San Antonio, Palomas, Sierra Pelon, Placerito, Mayo, San Gabriel, Santa Feliciana, San Francisuuito and the Pira, the oldest gold-bearing canyon in the State, which is located in Ventura county, but which rises in Los Angeles county.

Valuable gold diggings are reported to have been discovered on Lone creek, tributary to the Skeena river, B. C. Six hundred dollars is said to have been taken out by one man in two days. Two other men claim to have found $1,700 in three hours. Men are deserting the canneries and flocking to the diggings.

A huge rattlesnake was captured by Joe Chatham at the St. Julien mine, Amador county, one day last week. His snakeship had crawled into Joe's bed during his absence, and was killed for his imprudence. The dead reptile was brought to Amador City, and is now reposing calmly in a large bottle of alcohol in the drug store.

According to the Contra Costa *News*, the quicksilver and coal deposits in that county have proved to be of such great value that the Government has directed an examination of their metallurgical and geological worth, and to define the lines between agricultural and mineral lands. A surveying and scientific party left Martinez last week for the purpose of making examinations.

The body of the man found a few miles above Vallejo on Sunday is now believed to be that of Lawrence Lynch, ex-Master-at-Arms of the United States steamer Pensacola. He came to Mare Island recently from the East, for his discharge, and was paid off last Tuesday, receiving a $1,000 check on the United States Sub-Treasury and $54 in money. Foul play is suspected, and the case is being worked up.

The great bridge over the Colorado river at The Needles, in California, on the Atlantic and Pacific Railroad, has been completed. All trains are running through. Pullman sleepers will commence at once running from San Francisco to Kansas City, and Kansas City to San Francisco, without change or transfer. The line is said to be in fine condition for the transcontinental passenger and freight business.

Private advices from the State of Sonora, dated July 25th, state that the true facts regarding the yellow fever have been suppressed, and that the plague is increasing. Railroad men are especially in danger. On the Monday previous to the 25th inst. the people of Hermosillo were preparing to leave the town. Although the United States Government had sent Dr. T. King Ross to Nogales, and he has prevented several sick families from leaving, there is still danger of some coming into Arizona.

In the suit of Abraham vs. the Western Union Telegraph Company, in the United States Circuit Court at Portland, Judge Deady overruled the defendant's demurrer. Plaintiff, about a year ago, sent the following dispatch from Glendale to Roseburg: "Don't sell any wheat. Hold few days." The dispatch was received, "Don't sell all wheat." By this error plaintiff claimed he was damaged $20,000. The telegraph company demurred that there was no material change in the dispatch; but this was overruled as above stated.

HOW A COUNTERFEIT CAN BE DETECTED.—A circular issued by the *United States Treasury Counterfeit Detector* states that the new counterfeit ten-dollar Treasury note, which was recently reported as of the series of 1878, is of 1875 instead. In some respects this counterfeit is very well executed, while in others the work is very bad. All Treasury notes of the series of 1875 are printed on the fiber paper known as the Wilcox patent. The fiber has the appearance of coarse black hairs scattered through the paper, without regard to regularity, and may readily be seen in the open panel on the back of the note. The counterfeiters could not get this paper, but an attempt has been made to imitate it by printing black lines on the surface. The difference between the black lines and the fiber can be readily detected by the use of a magnifying glass or by tearing the paper across one of the fibers. In the border at the top of the genuine note the words, "This note is a legal tender for ten dollars," are distinctly separated from each other. In the counterfeit the letter "a" and the word "legal" form one word, as do the two words "for" and "ten." The last four letters of the word "printing," in the line below the one referred to, are in italics in the counterfeit, while the balance of the line is in roman. The red ink used on the counterfeit is poor and of brick-red color, while the ink on the original is of a bright carmine. The geometrical lathe work in the upper left-hand corner of the counterfeit surrounding the "X" is good, while that on the upper right-hand corner is very poor, and the lines in the work cannot be traced as they can in the genuine bills. On the back of the counterfeit the word "This," beginning the phrase "This note is a legal tender," etc., is printed "Tms." There are other slight errors in the printed law on the back of the counterfeit. There are no counterfeits on the series of 1869, 1878, and 1880.

UNNATURAL NATURAL HISTORY.—The pelican feeds its young with the life blood from its own bleeding bosom. This is a beautiful mistake, that will live forever in symbol and legend. The "real live" pelican has a large bag under her unwieldy beak, and digging with the beak toward the breast she feeds her brood and soils her feathers with red-stained tidbits of fish from the bag. The nightingale leans her breast against a thorn and sings in pain. In the old poets not only has she a thorn in her breast but she puts it there. Instead of being the voice of lonely love she ought to be the emblem of those discontented people who, in a position enviable to others, first make their own troubles and then spend their lives in self-commiseration. Of course the nightingale is not such a fool as she looks in poetry. Swans are said to sing a death song; this is poetry too. But they are hatched during thunder; and this is prose—the belief of otherwise sensible folk. Crows and curfews hate each other so that their eggs put in the same nest will all burst. Talking of eggs, the cock of the south of England lays an egg when the hen has ceased laying; it is a small, insignificant affair, with no yolk in it, clearly an amateur attempt. These cock's eggs are to be found in Sussex, if nowhere else. As we have got to the poultry yard, let Job's turkey have a word; the Americans have the honor of discovering that ill-conditioned bird. They say "as poor as Job's turkey, that had to lean against a fence to gobble," but there we must leave him, as he does not strictly belong to us.—[All the Year Round.

FLOWERS AT HOME.—When we want to remember a hilltop view, a meeting that has made a holiday, some spot holy with old history, we pluck a flower to hold the memory fast. When we want to send the home presence tangibly in a letter, a flower from the window or the field close by will carry it best. Old books drop out the faded blossoms; put there "to mark great places with due gratitude." The California miner caught sight of the mountain heart's ease just where his uplifted pick was going to fall, and ere it fell he was across the continent and in his own pasture, where a bare-foot boy he had drove the cows a thousand times. Hollyhocks and lilacs, who thinks of them and does not see a quiet dooryard in the sunshine? The sick soldiers in army hospitals, longing for certain faces, tones and touches, greeted the flowers as the best substitutes. "Now I've got something for you!" said a woman nurse, holding the bunch behind her, to a very sick New England soldier, "something for you just like what grows in your front dooryard at home. Guess!" "Laloes," he whispered; and she laid them on his folded hands. "O laloes! how did you know?" The lilacs outlived him.—[A Year of Miracle.

Said of Women.

Oh, if the loving, closed heart of a good woman should open before a man, how much controlled tenderness, how many veiled sacrifices and dumb virtues, would be seen reposing there.—[Richter.

Take the whole sex together, and you find those who have the strongest possessions of men's hearts are not eminent for their beauty. It often happens that those who engaged men to the greatest violence are such as those who are strangers to them would take to be remarkably defective for that end.—[Hughes.

God sends us children for another purpose than merely to keep up the race; to enlarge our hearts; to make us unselfish, and full of kindly sympathies and affection; to give our souls higher aims, and to call out our exertion; to bring round our faculties to extend enterprise and exertion; to bring round our firesides bright faces and happy smiles, and loving, tender hearts.—[Mary Howitt.

Women endowed with remarkable sensibility enjoy much, but they also suffer much. The greater the light the stronger will be the shadow.—[Ann Cora Mowatt.

Mighty is the force of motherhood. It transforms all things by its vital heat; it turns timidity into fierce courage and dreadless defiance into tremulous submission; it turns thoughtlessness into foresight, and yet stills all anxiety into calm content; it makes selfishness become self-denial, and gives even to hard vanity the glances of admiring love.—[George Eliot.

Efficacy of Soap and Water.

Those who are afraid of epidemic diseases may feel comforted on hearing that one of the best protective measures they can resort to is a very simple one—the use of soap and water. An eminent physician says: "It is worth while for common people to learn that 50,000 typhus germs will thrive in the circumference of a pinhead or a visible globule. It is worth while for them to note that these germs may be desicated and be borne like thistle seeds everywhere, and, like demoniacal possessions, may jump noiselessly down any throat. But there are certain things spores cannot stand, according to the latest ascertained results. A water temperature of 120 degrees boils them to death, and soap chemically poisons them. Here sanitary and microscopic science come together. Spores thrive in low ground and under low conditions of life. For redemption fly to hot water and soap, ye who live in danger of malarial poisoning. Hot water is sanitary; soap is more sanitary. Fight typhus, small-pox, yellow fever and ague with soap. Soap is a board of health. 'Cleanliness is next to godliness,' and so far as physical health goes, far in advance of what passes current for godliness in this wicked world. But, as a matter of fact, it is a poor kind of godliness that does not make people cleaner as well as better. Daily contact with soap and water will help wonderfully in properly regulating the habits of everyday life.'

Of No. 11 Kearny st., San Francisco, Treat all Chronic and Special Diseases.

YOUNG MEN

WHO MAY BE SUFFERING FROM THE effects of youthful follies or indiscretion, will do well to avail themselves of this, the greatest boon ever laid at the altar of suffering humanity. DR. SPINNEY will guarantee to forfeit $500 for every case of Seminal Weakness or Private Disease of any kind or character which he undertakes and fails to cure.

MIDDLE-AGED MEN.

There are many at the age of 30 to 60 who are troubled with too frequent evacuation of the bladder, often accompanied by a slight smarting or burning sensation, and a weakening of the system in a manner the patient cannot account for. On examining the urinary deposits a ropy sediment will often be found, and sometimes small particles of albumen will appear, or the color will be of a thin milkish hue, again changing to a dark and torpid appearance. There are many men who die of this difficulty, ignorant of the cause, which is the second stage of seminal weakness. Dr. S. will guarantee a perfect cure in all such cases, and a healthy restoration of the genito-urinary organs.

Office hours—10 to 4 and 6 to 8. Sunday, from 10 to 11 A. M. Consultation free. Thorough examination and advice, $5. Call or address

LOST HEALTH — DR. LIEBIG'S INVIGORATOR

DR. LIEBIG'S WONDERFUL GERMAN INVIGORATOR.

THE OLDEST, GREATEST AND BEST REMedy for the cure of Nervous and Physical Debility, Vital Exhaustion, Seminal Weakness, Loss of Manhood, Failing Memory and Relaxed and Enfeebled condition of the Genito-Urinary Organs.

It speedily cures Impotence, Early Decay, Loss of Vigor, SEMINAL WEAKNESS, and all the sad effects of youthful follies and abuse or EXCESSES OF MATURITY.

It permanently prevents all Unnatural Loss from the system, as thousands can attest who have used the Remedy in the past quarter of a century which it has been before the public.

It is indeed a wonderful remedy—toning the nerves, strengthening the muscles, checking the waste, invigorating the whole system and restoring the afflicted to HEALTH and HAPPINESS.

The Doctor will agree to forfeit $1,000 for a case undertaken not cured. The reason so many cannot get cured of Weakness and the above diseases is owing to complication called PROSTATORRHEA with Hypersthesia, which requires special treatment.

DR. LIEBIG'S INVIGORATOR, No 2, with our peculiar special treatment, is the only cure for PROSTATORRHEA. By it MANHOOD is restored and the hand of time moved back from age to youth.

Price of either Invigorator, $2. Case of six bottles, $10. Sent to any address, covered securely from observation.

Dr. Liebig & Co. treat successfully by Homœopathy every form of SPECIAL, PRIVATE or CHRONIC DISEASE without mercury or nauseous drugs. If vitality is drained from the body, numerous diseases follow that baffle ordinary medical treatment. If allowed to continue, the unnatural loss causes Consumption, Diabetes, Bright's Disease, Insanity, etc. Cures guaranteed. Diseases of the genito-urinary organs, kidneys, liver and bladder specially treated. DISEASES OF WOMEN SPEEDILY CURED.

Qualified and Responsible.—Dr. Liebig & Co. from EUROPE are regular college educated physicians, and are now in their nineteenth year of special practice.

If pimples appear on the face and body, if you become listless and easily tired and exhausted, look out for the complication with Seminal Weakness, discovered at the LIEBIG DISPENSARY, known as Prostatorrhœa. DR. LIEBIG'S INVIGORATOR, No. 2, is the only known remedy for the above complication, Prostatorrhœa.
